

David Addis

Senior C# and C++ developer with experience on console, mobile and AR/VR.

Location: London Email: dtaddis [at] gmail [dot] com

Skills

C#, C++, Java, Python, Lua • Unity, Unreal Engine, Maya, Blender, Adobe Suite • iOS, Android, AR, VR, Xbox 360, PS3, PC, PSP and NDS development • English, basic Swedish and Ukrainian

Experience

Principal Programmer at FundamentalVR May 2023 - Present

Lead engineer on a team creating VR simulations of surgical procedures for Meta Quest and desktop headsets using Unity and OpenXR. Responsibilities included liaison with design and medical teams, scheduling, product demos, and resolving major bugs and performance issues.

Lead Programmer at Factory42 September 2019 - April 2023

Managed a team of five programmers and shipped AR titles on iPhone, Android and Magic Leap, as well as VR prototypes on Meta Quest. Worked mainly in Unity, with Android Studio and other tools where appropriate. Liaised with production to keep projects on schedule and integrated location-based experiences on site.

Lead Programmer at NaturalMotion January 2013 - September 2019

Developer on the strategy game *Dawn of Titans*, working across believable troop movement for thousands of real-time soldiers, shaders, network code, Scaleform UI, tools, and an unreleased VR mode in an in-house C++ engine.

Senior Programmer at Lionhead Studios July 2008 - October 2012

Helped ship *Fable 2*, *Fable 3*, and the Kinect title *Fable: The Journey* using Unreal Engine 3. During the prototype project *Milo*, wrote several Kinect minigames in C++ and Lua.

Gameplay/UI Programmer at Electronic Arts June 2005 - July 2008

Wrote and maintained features for *Black* and several *Burnout* games.

Gameplay Programmer at Codemasters April 2004 - June 2005

Worked as a gameplay programmer on commercial game projects.

Education

Physics with Computing, BSc from The University of Warwick.

Other Interests

Runs a YouTube channel about games and technology, and develops games for fun, available on Steam and the Meta Quest store.
